

The UK government has an annual military budget of £48,000,000,000

...that's the 5th highest in the world

Spends 30 x more on researching weapons than renewable energy....

...while slashing public services

Spends £100million per year promoting arms sales to foreign buyers...

...regardless of human rights abuses

It's time to
shift priorities

**Take action
16-22 April**

Help promote sustainable security by redistributing the £48bn military budget towards things which keep us safe: healthcare, international cooperation & development, tackling climate change, and education.

Hold a ballot in your town and ask neighbours to consider what makes for a safer world. All you need is 4 jars and some beans.
